Interviewing Tips

For many of you, the biggest fear when approaching the interview is choosing the right one. Even the most qualified individual is not immune to stumbling over tough interview questions.

The key to success is preparation. By anticipating possible questions, you will be prepared to answer all the difficult questions that might be asked during the actual interview.

Of course, you need to do it in advance every question that is asked you will be prepared. The more interview questions the better you will become at answering questions.

Personal Presentation

You only get one chance to make a first impression and first impressions are lasting impressions. You present a good impression by your appearance, your attitude, your body posture and your eye contact.

Watch Your Body Image

Time: Arrive seven to 10 minutes early.
Handshake: When you enter the interviewer's office offer the interviewer a firm handshake.

Eyes: Establish eye contact. Attentive eyes demonstrate an eagerness.

Smile: Smile moderately. A smile helps alleviate nervousness and demonstrates you are pleasant.

Speaking: Speak in a clear audible manner.

Very little hair and length of your neck. Be sincere, pleasant and honest. Exude confidence.

Body Language: Relax your body. Keep your head up, back straight and shoulders back. Never slouch.

Hands: Keep hands relaxed on the chair arms or in your lap. Polishing fingers during interview is a bad habit.

Hair: Should be a suitable length, clean, tidy and styled.

Clothing: Should be suitable to the company dress. For women a suit or appropriate dress is best. Avoid accessories make up, perfume and jewelry. For men a suit or business casual and shoes should be polished.

For a very informal company a polo shirt or sweater could be substituted for a jacket. Clothes should be clean and pressed and shoes should be polished.

Handshake: Firm and confident. (Seven to 10 seconds)
